

RUMANIAN ARMS ARE SUCCESSFUL IN FIRST CLASH WITH AUSTRIANS

After Five Days of Hard Fighting the Soldiers of Francis Joseph Are Compelled to Withdraw Across the Cerna.

ENGLAND'S EAST COAST RAIDED BY ZEPPELINS

Official News From Greece Is Lacking; Revolt in Macedonia Spreading; Russians Report Slight Progress.

(BY MORNING JOURNAL SPECIAL LEASED WIRE.)
In the first battle between Rumanian and Austrian troops the Austrians have been forced to retire across the Cerna river, north of Orsova, near the Iron Gate. Vienna announces that the Austrian troops withdrew after five days of heavy fighting.

In eastern Transylvania the Austrian retreat continues. Hermannstadt has been evacuated. Apparently the Austrians are carrying out their reported plan of shortening the battle line in Transylvania.

London announces another Zeppelin raid over the east coast of England on Saturday night. Few details have been received. Bombs were dropped on several places.

The contents of the dispatch from the Greek capital, have drafted a note for presentation to Premier Zaimis. The note probably was handed to the Greek premier on Saturday. The nature of its contents is not known.

The arrival of an allied fleet off Piræus, the port of Athens, has been followed by the announcement that the flag of France has been hoisted on four German and three Austrian merchant ships in the harbor. Bureaucratic parties from the entire warship sailed the vessels.

No official announcement of political conditions has come either from the Greek government or the entire.

capitals. The revolt reported in Macedonia is now said to have spread over the whole of northern Greece.

Special dispatches from Athens say that Premier Zaimis had lengthy audience with King Constantine Thursday and afterward announced that Greece maintained her policy of friendly neutrality toward the belligerents. The Greek premier, another dispatch says, declared that political questions would be cleared up probably before Saturday morning.

Against strong Austrian resistance Petrograd says the Russians have taken positions forty miles east of Lemberg. Near the Hungarian frontier several heights have been captured. Attacks by the Russians against the Austro-German lines in Volhynia, Galicia and the Carpathians were repulsed, Berlin says. Some ground was gained north of Thorow, Galicia, and nearly 1,500 prisoners have been taken by the armies of Prince Leopold and Archduke Charles.

ONE OF THE ZEPPELINS IS BROUGHT DOWN IN FLAMES

LIBEL SUIT IS FILED
AGAINST NEW MEXICAN
BY FRANK A. HUBBELL

(SPECIAL DISPATCH TO MORNING JOURNAL.)
Santa Fe, Sept. 2.—Frank A. Hubbell, republican nominee for United States senator, through his attorneys, R. P. Harrow, of Albuquerque, and Judge E. H. Wright, of Santa Fe, today filed suit in the district court here against the Santa Fe New Mexican and Bronson M. Cutting, its proprietor, for libel, damages in the sum of \$50,000 being asked.

The filing of the suit was not unexpected, as Mr. Hubbell had stated immediately after the publication by the New Mexican of certain attacks upon him just prior to the assembling of the state republican convention that he intended to bring suit. The action is based on a publication of August 21, 1916, which the plaintiff alleges was false, malicious and defamatory and was printed for the purpose of injuring his candidacy for the nomination for senator and of preventing his election of nomination, and was intended to harass, annoy, wound and injure the plaintiff in respect to his feelings, honor, self-respect and dignity.

THE CALIFORNIA TO BE STRICTLY MODERN WARSHIP

New Super-dreadnaught Will Be as Near Impregnable to Mine and Torpedo Attacks as Is Possible to Make Her.

(BY MORNING JOURNAL SPECIAL LEASED WIRE.)
San Francisco, Sept. 2.—Reside being an electrical marvel, the new super-dreadnaught California, which is to have her keel laid probably some time this month at Mare Island navy yard, will be as near impregnable to mine and torpedo attacks as it is possible to make a modern warship. The armor and other protection against these weapons have been worked out in the greatest detail and the result of careful study of naval engagements in the present European war.

When the contract for battleship No. 44 was awarded to the Mare Island navy yard, the name "California" already had been given to battleship No. 49, under construction at the New York navy yard. Inasmuch as No. 44 was to be the largest warship to be built on the Pacific coast, the navy department directed that the name of the one to be built at Mare Island should be changed to California and the one building in New York should be named the New Mexico.

Mine and Torpedo Proof.
For some time before the plans for the California were made the navy department experts satisfied themselves by exhaustive tests that vessels of the proposed construction could not be sunk either by striking a mine or torpedo attack. It is understood that the construction of the hulls below the water line is made of steel, and the armor plating is of steel but will not be rigid, as is the case in other ships. Also, resistance has been increased 25 to 30 per cent.

The main engines will be electric, the electric generators being driven by steam turbines of 28,000 h. p., the electric supply by oil-burning water tube boilers. Not only the type of the machinery installation but its arrangement is said to be entirely different from any ever adopted for any previous warship.

She will be fitted with two cage masts bearing fire-control platforms for controlling the fire of the guns, similar to the familiar type designed by American constructors and now fitted on all battleships of the United States navy. Another feature of her appearance that immediately attracts attention is the clipper type of bow, instead of the conventional ram.

Electricity Employed.
The use of electricity throughout the vessel will be most extended. In addition to the main propelling engines of the ship, the handling of the ammunition and firing of the guns will be done by electricity. Boats will be hoisted in and out, anchors raised, the vessel steered, and ventilating blowers operated by electricity.

Other minor machines driven by electricity will be potato peeling, which is performed in a separate compartment, the machine having a capacity of 1,000 pounds per hour; ice cream freezing, complete laundry installation, printing machinery, food and meat grinder, kitchen and cake machine of sixty-quart capacity, dough mixer of two barrels per hour, and a dish-washing machine that will handle 1,000 dishes per hour.

Principal Characteristics.

The principal characteristics of the California are as follows:
Length, over all, 624 feet; breadth, 96 feet; depth, 47 feet 2 inches; mean draft, 30 feet 3 inches; displacement (on this draft), 32,500 tons; speed, 21 knots (12 hours) fuel oil capacity (normal), 1,500 tons.
Armament: Twelve 14-inch, 50-caliber breech-loading rifles; four submerged torpedo tubes, twenty-two 5-inch rapid-fire guns, four 6-pounder guns for sailing, two 1-pounder guns for boat; four 3-inch anti-aircraft guns; one 3-inch landing gun; two 30-caliber machine guns.

Powerful Gun Batteries.

The 14-inch main battery guns are of an exceptionally powerful type and will be mounted in three, in four center-line, heavily armored turrets. The complement of the vessel is fifty-eight officers and 1,022 men. Every convenience necessary for the health and comfort of officers and crew has been carefully thought out in this ship.

The name California previously was borne by an armed cruiser of the Pacific fleet, rechristened the San Diego when her former name was assigned to the new battleship. The San Diego now is the flagship of the Pacific fleet. It is probable the California, when placed in commission, will take her place.

MEXICAN MEDIATORS ARE GIVEN GLAD HAND

(BY MORNING JOURNAL SPECIAL LEASED WIRE.)
New York, Sept. 2.—Ignacio Bonilla and Alberto J. Pani, members of the Mexican commission, appointed to confer with representatives of the United States, to settle difficulties between the two countries, arrived here today accompanied by their families and a retinue of servants and secretaries. They were welcomed at their hotel by Secretary of State Robert Lansing and Ezequiel Arredondo, Mexican ambassador-designate. Luis Cabrera, the head of the Mexican commission, was expected to arrive later in the day. The first meeting of the two commissions is to be held Monday.

Candidate Arrested.
Choyenne Wyo, Sept. 2.—Orin C. Hubbell, candidate at the recent primary for the republican nomination for sheriff, was arrested today on charges of complicity in election frauds.

SINALOA CAPITAL IS CAPTURED BY REVOLUTIONISTS

Rebel Forces, Under Carrasco, Take Mazatlan and Are Reported to Be Active in Other Parts of the Mexican State.

(BY MORNING JOURNAL SPECIAL LEASED WIRE.)
Douglas, Ariz., Sept. 2.—Reports tending to confirm the recent rumor of the taking of Mazatlan, the capital of Sinaloa by rebel forces, were received here today from the interior of Sonora by Americans. It is reported in Hermosillo and Guaymas that a force under General Carrasco, formerly a Carranza commander in the southern part of Mexico, entered Mazatlan late last week at the head of a body of troops, and the garrison, numbering 150 men, turned over to him without a fight.

Cullacan, the second largest city in Sinaloa, is also reported to have turned over to Carrasco without a struggle, because of dissatisfaction with the Carranza government. Gen. Angel Flores, military governor of the state, was not implicated in the movement, as it was first reported. He, with a majority of his men, was on the Chihuahua border at the time, on the lookout for Villistas.

SPECTACULAR SCENES IN "MASKED RIDER" AT THE LYRIC TODAY

Harold Lockwood and May Allison, the popular Metro-quality stars, will be seen on the screen here at the Lyric theater today only in "The Masked Rider," a thrilling five-part production of mystery, romance and adventure. They are surrounded by a strong supporting cast, including Lester Cuneo, the well known heavy leading man, John Macdonald, Howard Truettell, Harry Linker, Harry Berthard, H. W. Willis and Clarence Selwyn.

The story of "The Masked Rider" is laid in the mountains of North Carolina, where most of the scenes were photographed. Through special arrangements the Metro players were given permission by the government to use a deserted moonshining still and rendezvous for some exciting scenes. The old hat cave inn also figures prominently in this feature.

Mr. Lockwood is seen at his best in "The Masked Rider." He is given unlimited opportunity to display his prowess and horsemanship in a score of sensational situations. Miss Allison as the mountain girl, is thoroughly at home in her part, for she is really a daughter of the southland. One of the spectacular scenes in the production is the dynamiting of an underground hiding place of a gang of desperate moonshiners.

THEDA BARA IN HER GREATEST PLAY NOW AT THE PASTIME

Theda Bara, supported by Stuart Holmes, will be seen at the Pastime today and tomorrow in a masterful picturization of Ouida's great story entitled, "Under Two Flags." This is said to be Miss Bara's greatest picture of her long career before the camera.

Here are some of the big moments in William Fox's new feature film, "Under Two Flags."

1. Bertie Cecil assumes the guilt of his brother's forgery of a check. He saves his brother but ruins his own life.

2. Cigarette, at the head of a troop of Frenchmen, marches to the rescue of Bertie and his followers, almost mastered by the Arabs.

3. A court-martial condemns Bertie to die for striking his superior officer, when the officer had insulted him.

4. Cigarette takes a leap on horseback across an enormous chasm, then braves a terrific sandstorm in being the rescuer which must save Bertie's life.

5. Cigarette is killed by the bullets intended for the man she loved, but she arrives in time to save him from death.

'THE WASHINGTON' APARTMENTS ARE READY FOR GUESTS

The building which are just being put on the Washington Apartments, 1002-1010 West Central avenue, Condominiums who have inspected "The Washington" are held in their praise of these model apartments. Everything that modern craft can devise has been utilized to make them, strictly up-to-date and they are not only a credit to the designer and builder but to the city of Albuquerque. A new innovation will be the Turkish bath, which will occupy the east half of the basement fronting on Tenth street. J. D. Eakin, the proprietor, states he intends to set apart one or two days each week as holiday days, at which time matrons who are expert in the business will have sole charge. The baths will be opened up in time for the big state fair. Due notice will be given in the paper. Quite a number of apartments have already been leased and families are now moving in. Those desiring to make reservation are requested by the proprietor to call at office at rear of east building in basement. Phone 2622.

Chamberlain's Cough, Cholera and Diarrhoea Remedy.

This is a medicine that every family should be provided with. Cough and diarrhoea often come on suddenly and it is of the greatest importance that they be treated promptly. Consider the suffering that must be endured until a physician arrives or medicine can be obtained. Chamberlain's Cough, Cholera and Diarrhoea Remedy has a reputation second to none for the quick relief which it affords. Obtainable everywhere.

**GREAT PICTURE
NOW AT CRYSTAL
HIGHLY PRAISED**

"The End of the World" Proves Agreeable Surprise to Discriminating and Educated Patrons of Silent Drama.

"I am certainly surprised, and agreeably so, at this picture, referring to 'The End of the World' and it is my candid belief that if the people of Albuquerque knew what you were offering at the small admission the Crystal would never take care of the crowds who would want to witness this spectacle," stated a well known public school teacher to the manager of the Barnett Amusement company, who was standing in front of the second street theater at the conclusion of the second afternoon performance yesterday.

"There is no doubt in my mind but that the small admission asked frightened many who are in the habit of paying advanced prices for feature pictures away, but personally I thought I would 'take a chance,' and am delighted that I did so. I should think that if any picture can run a week in Albuquerque 'The End of the World' could so for those who witness it are sure to send friends and acquaintances."

While but one expression is quoted, hundreds of others who witnessed the unusual feature at the Crystal expressed their approval and pleasure, and it is likely that the attendance this afternoon and tonight will be merely a matter of capacity, for this attraction cannot be held over for Monday, it being booked solid for weeks ahead.

Delightful Novelty.
One of the delightful novelties introduced in the electrical dance in which a bevy of young Danish maids lend support to Emma Thomson, the famous artist of Copenhagen, who appears in the wayward meter and who in the end pays in full the price of a sinful life. The lighting effects in this dance are little short of wonderful, and were awarded rounds of applause at all the performances yesterday.

Aside from the big scene which follow the comet's contact with the earth, the picturization of the story is excellent and holds the attention from the outset to the close. The acting of the entire company is superb, and the great care given to detail in staging is well worthy emulation by the big American picture makers.

Probably not since the production of "The Fall of Troy," by the Milan company, has any foreign concern attempted so lavishly a spectacle as "The End of the World" and those who go to the Crystal either this afternoon or tonight will have no occasion for complaint, but much in the way of self-congratulation.

LINO PONCE IS SENT TO CHIHUAHUA FOR TRIAL

(BY MORNING JOURNAL SPECIAL LEASED WIRE.)
El Paso, Tex., Sept. 2.—Lino Ponce, formerly a colonel under Orozco, brought to Juarez today from Casas Grandes, was sent to Chihuahua City for trial on a charge of plotting against the Carranza government. Military authorities in Juarez declined to discuss the charges, but it was reported that as a result of Ponce's alleged cabal, forty men of the de facto garrison at Ascension, forty miles south of Columbus, N. M., revolted Wednesday night, but were overpowered and their leader, Captain Vicente Carrion, was killed.

Reports were current in Juarez that the garrison at Pearson simultaneously attempted unsuccessfully to mutiny.

THE DEMAND CONTINUES

The demand for graduates, even for advanced students and undergraduates, continues so persistently that the management of the Albuquerque Business College is unable to supply one-half the calls received of late for young people to accept good positions in business offices and elsewhere. Young people should heed this demand and begin their preparation at once.

Fall Term opens Sept. 5th. Phone 627 for particulars.

Monday is "Labor day," September 4. No business will be transacted at 212-214 West Lead avenue.—E. W. FEE.

KELLY

Comfort Chairs and Davenport

THE KIND THAT ARE BUILT FOR REAL COMFORT AS WELL AS FOR SERVICE

The Comfort Chairs

Without any push buttons, locks or catches. Simply sit down in it and adjust it as you like.

Kelly Davenports

Are built to make a comfortable seat as well as a comfortable bed. The double stuffed upholstery is made over long flexible coil springs tied eight ways and the bed is built in the back which insures a deep, soft cushioned seat.

Who Cares

If you buy more meat than you need from your butcher and some of it is wasted, do you get angry with him for selling it?

If you purchase more fruit or vegetables from your grocer than you can possibly use and have to throw some of it away, do you lose your temper and accuse the grocer of dishonesty?

If you throw some coal away with the ashes, do you feel that the coal man has cheated you?

If you leave the refrigerator open and waste the ice, do you quarrel with the ice man? Of course not!

But sometimes when you carelessly waste gas and electricity you put all the blame on the Company and get angry and say things you ought not to say. Neither the butcher, the provision dealer, the ice man nor the coal man concern themselves with how much you waste; but the gas and electric Company—while urging you to use gas and electricity.

We Urge You Not to Waste Either
